TOURISM DEVELOPMENT STRATEGIES (M.A.)

I especially liked...

The international focus is very important in the TDS master's program and it has helped me during my different job positions and also in private life to deal with different people and cultures.

Further, the course „Managing Financial Performance“ gave valuable insights in Revenue Management and has inspired me to work for an airline.

In general, the program offers excellent insights into the tourism industry, lectures are delivered in English with a strategic focus.
