

**Hi, my name is Tymur Bairamov and I study Baltic Management Studies.**

### **I decided to study at the University of Applied Sciences, Stralsund because ...**

the University combines theory with practice, and it is one of the main factors why I've chosen to study here. Another factor is the size of the University. It is rather small, around 3000 students, but very comfortable place for studying, because you can easily talk to professors, not like in huge Universities, and everyone is open to help, and it is a very friendly environment to be. There are many sports and social activities where students can participate. And finally, it is situated right on the Baltic Sea, which means fresh air and a peaceful atmosphere.

### **I study Baltic Management Studies because ...**

I found all subjects useful for future managers and the program is completely in English which proves its international vision. Also, I have the possibility to attend a German language course and in addition to that, to learn other languages like Swedish, Norwegian, Polish, Russian and Spanish.

## **I especially like ...**

that everything is on one campus, including the library, refectory, sports facilities and dormitories. Everything you need is situated close by and you can reach all necessary places as supermarkets or the city center by bicycle or on foot.

## **The Hanseatic town of Stralsund as location to study...**

is perfect because of its beautiful architecture, access to the sea, small parks and lakes, that create a pleasant atmosphere for students to learn. There is less distraction in comparison to bigger cities.

At the same time, the city is situated only half an hour from the beautiful island of Rügen, one hour from Rostock, the biggest city of the federal state and three hours from famous cities like Berlin and Hamburg.

## **After my graduation ...**

I would prefer to continue my studies on one of the Universities in Germany in a Master program focusing on International Business.

## **Hast Du noch Fragen?**
