Educational and professional objectives

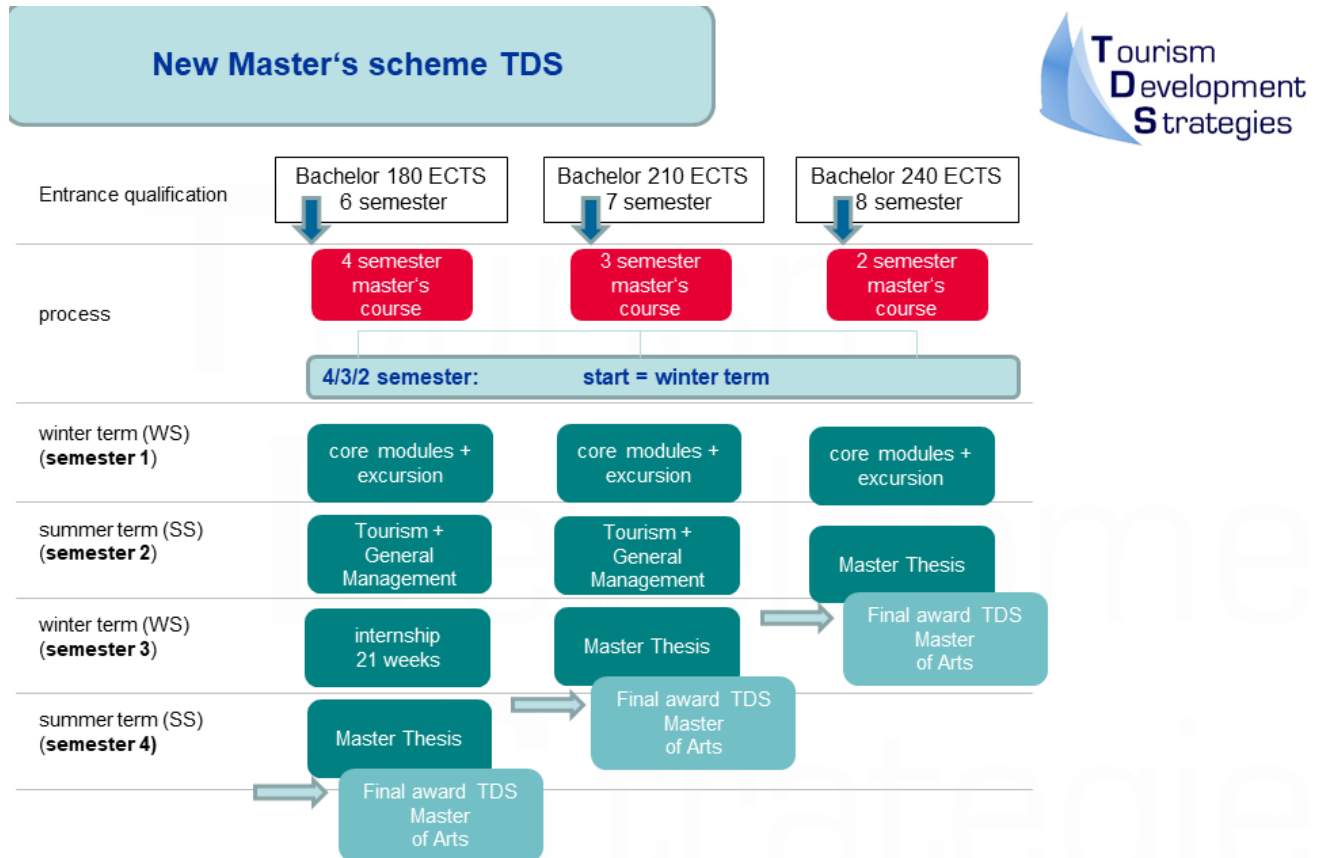

Tourism is an attractive and important economic segment. In this industry many different stakeholders with continuously increasing needs are involved. Hence, the content-related focus of our master's program is consistently aligned to the market. By acquiring branch-specific and general management skills they will be enabled to take part in and to pilot tourism development processes. By that, their active role within the planning and marketing of regions is particularly noteworthy.

Apart from expert knowledge in tourism, in business administration and in general management, you will obtain skills and methods that will prepare you for the dynamic changes seen in politics, the tourism industry and society. Our goal is to provide you with the skills to act responsibly and independently. That's why we will strengthen your social competence and, at the same time, develop your personality. Tourism and internationality go hand-in-hand and therefore our master's program will also enhance your multicultural competence.

Structure and content

Our master's program is tailor-made for every graduate of Business Studies as we offer a 2-semester, 3-semester and 4-semester course. Thus, it is extremely flexible. The duration of the master's program depends on the duration of the bachelor's program.

The core modules as well as the international excursion take place together in one group during 1st semester. According to your first cycle degree (Bachelor) the final semester of your master's degree course could be your 2nd, 3rd or 4th semester.

The master's program has a modular structure which culminates in students writing their Master's Thesis at the end of the program. According to your first cycle degree (bachelor) this final semester of your master's degree course could be semester 2., 3. or 4.

I. 2-semester program

The first semester (winter semester) provides an intensive program of study encompassing the following modules:

- Tourism in Practice (with international excursion)
- Individual and Organizational Development
- Research and Case Project (real case with an enterprise)

Compulsory Electives (two out of three):

- Global Business Development
- Managing Tourism Markets
- Special Topics in Tourism (Tourism and Digitalization)

The summer semester is dedicated to write the final thesis entirely.

II. 3-semester program

This program starts also in winter semester. The 1st semester is consistent with the 2-semester course totally.

During 2nd semester (summer semester) the following modules take place:

- Managing Financial Performance
- Destination
- Personal Skill Development – Value Based Management

Compulsory Electives (three out of four):

- Tourism Economics
- Strategic Human Resource Management
- Communication and Media Management
- Political Economy of Tourism

The last semester (winter semester) is dedicated to write the final thesis entirely.

III. 4-semester program

This program starts in winter semester also. Semester one and two are totally consistent with the 3-semester course.

The 3rd semester is spent gaining job experience by completing a 21-week internship. The internship must be management-related.

The last semester (summer semester) is dedicated to write the final thesis entirely.

Program features

Up-to-date teaching and learning methods as well as academic study trips ensure that participants directly apply new skills into practice. Our excursions to attractive destinations (e.g. Canada, USA, Dubai/UAE, Muscat/Sultanate of Oman, Sri Lanka, Thailand) comprise seminars and networking opportunities with international companies and institutions.

With our master's program, we are not only supporting you with various essential concepts for today's business world; such as innovation, change management, current trends, risk management, product development, sales, diversity etc. but also constantly provide you with distinguished professional contacts and job opportunities. International company meetings and field experiences, conferences and workshops will always be a part of your education to combine your theoretical knowledge with practice. With interactive, practice-oriented lectures and real projects, you will be introduced to the demands of the professional world. All of our professors and instructors are very well informed about up to date methods and tools that will get you ready for your career path. They will be personally mentoring and training you during your TDS education. With this excellent combination, you will be packed with skills and experiences that will open golden doors for you after graduation. (Often, even already before you actually graduate!)

In a nutshell... TDS = international, strategic & individual

5 reasons for YOUR TDS study at the Hochschule Stralsund

- ✓ international, English-speaking and practice-oriented Master's degree
- ✓ tailor-made, individual structure – unique in Germany (2 / 3 / 4 semester)
- ✓ excellent career prospects in growth markets
- ✓ individual coaching, small study groups & a committed team
- ✓ 5 minutes to the beach 😊

Structure: 4-semester program (start: winter semester)

<p>Lernergebnisse des Moduls / Qualification objectives and learning objectives</p>	<p><u>Knowledge and understanding</u> Introduction into selected methods and techniques of user-centred design of digital innovations and related innovation processes. Understand the phenomena affecting tourism today and in the near future and the digital solutions on offer. Have a solid grasp on the technologies and strategies required for successful digitalization.</p> <p><u>Applying knowledge and understanding</u> Selected case studies illustrate their application in practice. The introduced methods are applied in supervised exercises and final group work to solve a real-world problem. Performing an adapted version of an Online Design Sprint based on the Google Design Sprint methodology. Design data-driven user-centric experiences and processes.</p> <p><u>Making judgements</u> Examine how digitalization is shaping business models in tourism management.</p> <p><u>Communication</u> Articulate challenges and opportunities that arise from digitalization for the tourism industry.</p> <p><u>Learning skills</u> Understand why and how digital tourism has revolutionized the way tourists research, plan and experience their holidays as well as how to master to master big data, mobile payments, reputation management and micro-location to remain relevant in the tourism industry.</p>

	Evaluate the possibilities of digital innovations and processes for the tourism industry. Evaluate the role of digitalization for destination management. Methodology Dealing with change and near future applications in tourism. Enhance students' strategic thinking and acting abilities.

<p>Lernergebnisse des Moduls / Qualification objectives and learning objectives</p>	<p><u>Knowledge and understanding</u></p> <p>Students have a deep understanding of the kinds of questions that media economics seeks to address. They are capable of describing and evaluating the different types of competitive market structures that exist in the media industries. They have the ability to identify and explain some of the key economic characteristics of the media. Students are able to distinguish between strategies of vertical, horizontal and diagonal growth.</p> <p><u>Applying knowledge and understanding</u></p> <p>Students can define, interpret and value the new challenges posed by the media organizations' external environment with a deeper understanding of the particularities of emerging markets. Insights into several case studies enable them to break down issues of the media industry into their parts and of noting how the parts fit together. They are able to explain the principal motivations behind media and cross-media expansion and analyse the practical economic advantages associated with these strategies. They are capable of analyzing, describing and discussing the practical implications for media firms of 'convergence' and of 'globalization'. Students are aware of the specific internal capabilities media organizations need to develop in order to put their ideas and strategies into practice.</p> <p><u>Making judgements</u></p> <p>They are able to use a series of statements connected logically together, backed by evidence, to reach a conclusion. They are able to decide on the worth of topics by comparing it against an accepted standard of value.</p>

	<p>They are enabled to evaluate selective communication tools for suitability in given markets.</p> <p><u>Communication</u> Listening actively (taking notes, asking questions, engaging in ideas being communicated). Reading (decoding written words and images). Turn taking (effectively switching from receiving ideas to providing ideas). Students discuss results obtained in class.</p> <p><u>Learning skills</u> Critical thinking, creative thinking, communicating, and collaborating. Evaluating communications instruments for brands and market situations.</p> <p><u>Methodology</u> With selected creative methods students learn how to develop innovative ideas, to assess these independently and to implement them in changing organizational contexts. They have a synoptic view of change and decision-making within media organizations. Students are able to transfer knowledge to new types of Media, to foster problem-solving processes as well as communication strategies.</p>
